SUMMARY

AI Developer specializing in building and optimizing predictive models using **Python and TensorFlow**. Actively expanding into **Artificial Neural Networks (ANN) and Reinforcement Learning** to bridge the gap between static data insights and dynamic AI productivity solutions for small businesses and creators. Foundational knowledge in HTML, CSS, and C++, complemented by strong teamwork and communication skills. Led team projects in academic settings, enhancing collaborative and problem-solving abilities. Seeking opportunities to leverage these skills in a dynamic tech environment to contribute to innovative Machine Learning Projects.

PROJECTS

Farm Pure (Group Project)

VIT Bhopal University • [FarmPure](#) • September 2024 - December 2024

- FramPure is a revolutionary platform designed to connect farmers directly with consumers, reshaping the way fresh produce is bought and sold.
- My role was to create a GPS Tracking System which will render the current location of the user and also allow to set the latitude and longitude of another location.

Financial News Sentiment Detector

VIT Bhopal University • [Financial News Sentiment Dashboard](#) • December 2025

- This Streamlit application provides real-time financial sentiment analysis on stock tickers using news articles fetched from NewsAPI.org and processed by the specialized FinBERT language model

KAI – Emotion Detection (Group Project)

VIT Bhopal University • [kai-emotion detection](#) • August 2025 – Current

- The core innovation of this project lies in its ability to perceive and react to the user's emotional state. By capturing facial expressions through a camera feed, the system classifies emotions such as happiness, sadness, or anger and adjusts its conversational tone and visual animations accordingly.
 - My role was to integrate the backend together
-

EDUCATION

Bachelor of Technology in Computer Science with specialization in Artificial Intelligence and Machine Learning

VIT Bhopal University • Bhopal, Madhya Pradesh • 2027 • 8.21

- Created a group project website "FarmPure" which connects local farmers to customers directly
 - Created a group project "Brain Tumour Classification" which detects the tree types of brain tumour
 - Completed a 100 days code challenge offered by the university
 - Decor Team Lead of Meraki-The Fine Arts Club
 - Core Team Member of FeedBox College Club
-

CERTIFICATIONS AND ACCOPLISHMENTS

Computer Vision: [CV](#)

VITyarthi • 2026

Google IT Support: [5-Course Certificate](#)

Coursera • 2026

Azure AI Engineer Associate: [Microsoft Course](#)

Microsoft • 2025

Cloud Computing

NPTEL • 2025

Fundamentals in AI and ML: [AI ML](#)

VITyarthi • 2024

Python Essentials

VITyarthi • 2023

SKILLS

Web Development: HTML, CSS, Leaflet

Cloud: Amazon AWS, Microsoft Azure

Python: Matplotlib, Keras, Scikit-Learn, Streamlit

Machine Learning: Classification, Regression, Neural Networks, ResNet
